

FOR DMs of all levels of experience

WHO want DMing campaigns to be a smoother experience

THE Website we are calling Roll2000

THAT Helps DMs by visually organizing campaign elements, and allows dms to auto roll skill checks and attacks, and log all campaign activities to both review what happened and share with others who might want to run the same module.

UNLIKE Roll20 or DMhelper,

OUR PRODUCT logs campaign sessions and makes the accessible for others to review.
